

CICOM EVENT APP

Documentación de la app para el CICOM 2019

web. [Demo](#)

run

Run npx lerna bootstrap and yarn start:web

Run npx lerna bootstrap and yarn start:app

Run npx lerna bootstrap and yarn start:landing

Yarn

```
npx lerna bootstrap && yarn start:web
```

Go to [localhost:3000](#)

Docker

Run with docker

```
docker-compose up
```

Go to [localhost:4000](#)

Tools

- React router [react-routing](#) simple routing
- Ramda [ramda](#)
- Test [teact-testing-library](#)

Organization

Modules structure

```

.
├── /src
│   ├── /modules -> a module is a set of views and components,
│   │           for example the authentication module has submodules
│   │           (login, forgot Password, and register)
│   │   ├── /module(example organization module)
│   │   │   ├── /__tests__
│   │   │   │   └── ui -> these components is only used for the module
│   │   │   │       ├── /component (example estrure for a component)
│   │   │   │       │   ├── index.tsx
│   │   │   │       │   └── styles.ts
│   │   │   └── index.tsx
│   │   └── styles.ts
│   └── /shared -> is a components shared between several modules
├── /utils
├── .env.example
├── .env
└── ...others configuration files

```
